ABOUT US

Early Milestones Colorado is partnering with Developmental FX (DFX) to offer the support you need to give the very best to kids in your care.

Developmental FX is a nonprofit organization and Denver-based clinic that specializes in providing care through a multidisciplinary lens for children who have developmental challenges.

How can we help? We invite individual daycare and preschool providers to call or email us when they need support dealing with specific behavioral issues. They will be able to speak directly with an occupational therapist in real time for short consultations and receive coaching on actionable solutions.
